Cash Flow Quadrant

CASHFLOW QUADRANT

4 WAYS TO PRODUCE INCOME

LINEAR INCOME VS. LEVERAGED & RESIDUAL INCOME

Most of us are familiar with the upper left quadrant as we have been trained or conditioned to be employees. Being an employee or self-employed makes for about 95% of the population and it creates a huge dependency... **Ourselves.**

Financial Tools

- ❖ JSE/NYSE/LSE/NASDAQ/ Stocks
- ❖ Real Estate Investment Trusts (REITs)
- ❖ Gold & Precious Metals
- ❖ High-Interest Emergency Savings
- ❖ Cryptocurrencies-
- ❖ Exchange Traded Funds (ETFs)
- ❖ Global Indices
- ❖ Dividend/Interest
- ❖ Bearing Investments.

Risk Profiles

❖ How old are you?

Your age affects the amount of time that you have to invest. Younger investors can afford to invest in riskier asset classes like equities, because they have more time to recover if their investments take a dip. Older investors who are nearing retirement are safer investing a greater percentage in less risky asset classes, like cash and bonds

❖ How long can you keep your money invested before withdrawing it?

The longer you leave your investment untouched, the more returns it will generate. If you have more time, you also might be able to include more risky assets in your portfolio.

Financial Market Basics

- ❖ Forex markets,
- ❖ Stocks market,
- ❖ Crypto, and
- ❖ Savings accounts.

Forex vs Investing

- ❖ Forex trading involves speculating on short-term currency price movements in a 24/5 global market using high leverage, while investing involves a long-term approach to owning assets, like stocks or bonds, with the goal of building wealth over years or decades through growth and dividends.
- ❖ Key differences include time horizon (short-term vs. long-term), focus (technical analysis vs. fundamental analysis), risk profile (high with leverage vs. lower with direct ownership), and market hours (24/5 vs. structured business hours).

Three Decisions

- ❖ When to place a trade.
- ❖ When to close a trade.
- ❖ When to take profits on a trade
